Subject: Application for Senior / Full-Stack .NET Developer

Dear Hiring Manager,

I am excited to submit my application for the Full-Stack / Senior .NET Developer position. With over 5 years of hands-on experience across the modern Microsoft .NET ecosystem - including C#, ASP.NET Core, RESTful Web APIs, Entity Framework Core, and Microsoft SQL Server - I specialize in building scalable, secure, and resilient enterprise applications.

In my current role as SDE I at Momentum Pvt. Ltd. (Urban Harvest & Deliverit), I architect and optimize high-throughput backend services and REST APIs supporting quick-commerce and supply chain logistics. My work includes tuning SQL stored procedures and database indexing to reduce latency by 35% during peak traffic, as well as applying Clean Architecture, CQRS, and Repository patterns to guarantee long-term maintainability.

Additionally, I actively leverage modern AI-assisted engineering tools - such as Cursor, Claude Code, Google Antigravity, and OpenAI Codex - to accelerate test coverage authoring, complex refactoring, and sprint velocity without compromising rigorous architectural standards. Combined with my prior 5 years of full-stack engineering at Intellisoft Technologies, I bring proven leadership in delivering mission-critical web applications from concept to production.

I welcome the opportunity to discuss how my technical expertise in scalable backend architectures and AI-augmented developer practices will add immediate value to your engineering team. Thank you for your time and consideration.

Sincerely,

Praveen Kumar

SDE I @ Momentum Pvt. Ltd. | Full-Stack .NET Developer
